

BACK TO WORK NOW

Unisys Providing Field Services and Security Integration to Inspire Health Testing Solution

HIGHLIGHTS of the INSPIRE SOLUTION

Value

- Enables you to reopen and return to productive operations
- Gives you control of access by programmatically barring individuals who have just tested positive
- Applies multiple layers of protection, including thermal scanning at each entry
- Reassures concerned returnees with measures taken to promote their workplace safety

Features Supported by Unisys

- Verifies and protects individuals' identity
- Integrates with modern building management, badge scanning, and lock systems
- Supports HIPAA-compliant security rules in the test results repository
- Integrates with contact tracing and workforce management systems such as ServiceNow's Safe Workplace and Microsoft's Power Apps Return to Work

Features Supported by Inspire

- Tests for antigens and antibodies
- Offers an economical approach to health safety

The world is reopening unevenly due to regional spikes in COVID-19 infections. Government recommendations change regularly making it difficult to plan. But returning key elements of your workforce back is critical. The urgent question is: **How will you bring them back quickly and cautiously – and then make sure your customers and vendors don't introduce preventable health risks on your premises?**

Your decision goes to the heart of your gravest responsibility – business continuity for mission fulfillment – and it is urgent. You cannot protect your people 100% but you can reduce the risk of contagions into the workplace.

Rigorous testing with immediate results is ideal, but until now, your options have been less than ideal: overwhelmed labs, hard-to-reach testing facilities, high cost – as much as \$200 per test – and test result delays.

Return to work, return to school and help keep people safer with fast, on-the-spot, and economical COVID-19 testing and access control.

What Can You Do? Install Real-Time Testing and Access Control

Unisys has been selected by Inspire Health Alliance to deliver key components of an integrated Inspire testing solution, to include integration, scaling, field services, and security.

Point-Of-Care COVID-19 Testing* With Results in Minutes

- Highly portable test systems, sets-up quickly on your premises
- Economic per-test pricing based on quantity
- Communications and scheduling app
- Includes antigen (do you have it?) and antibody (did you have it?) testing
- Test results in 15 minutes with privacy
- Security to ensure regulatory compliance

Accurate Identification and Temperature Scanning

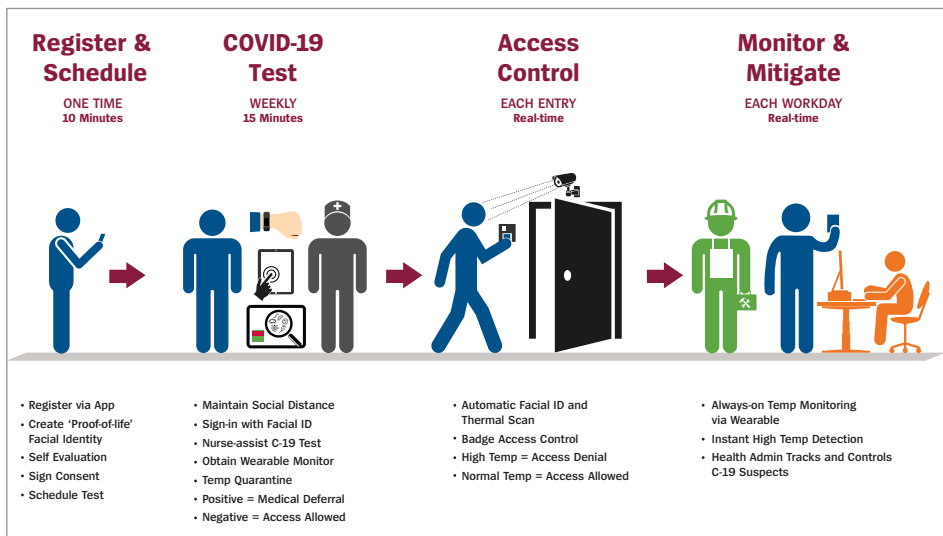

- Thermal biometric cameras detect atypical temperatures
- Identity verified through facial recognition
- Helps protect worker privacy
- Supports automated access control

Contact Tracing and Workforce Management

- Automated and human-assisted contact tracing
- Employee readiness surveys
- Workplace safety management
- PPE Inventory management
- Safe workplace visibility dashboard

How Your People Will Experience the Process

They will experience an automated, efficient, fast, safe, secure and respectful process:

* AFIAS-6 analyzer and COVID-19 Test Kits are sold and supported by Inspire Health Alliance LLC

For more information on how you can provide the continuity of your business by bringing your people back now with economical, efficient, and enhanced safety, please visit www.unisys.com/backtoworknow.

A Partnership Between Alliance and Unisys

Inspire Health Alliance provides the FDA-approved AFIAS-6 COVID-19 testing device and test kits, wearable monitors, data analytics and management platform and healthcare workers who assist the test-takers.

Unisys adds security integration features, such as facial identity with **Stealth(identity)**™, secures test systems and data in motion with **Stealth(core)**™ software defined security performs all systems integration (card scanner and networking), and can thermal biometric cameras.

ServiceNow's **Safe Workplace** and Microsoft's **Return to the Workplace with Confidence** can be integrated and used for COVID-19 safety management.

WHY UNISYS?

Inspire chose Unisys to provide the following expertise supporting Inspire's healthcare solution:

- Biometric identity authentication
- Workflow automation for contact tracing and alerts
- Encryption and endpoint security
- Systems integration
- Digital workplace services
- Cloud hosting
- Data analytics
- Field service support
- Remote management
